**DETAILED ACTION**

***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Choose one of:

- A1. A transfective LCD whose phase difference differs between the reflective area and the transmissive area [Fig. 2, for instance; cf. claims 1-23].
- A2. A transfective LCD whose slow axis differs between the reflective area and the transmissive area [Fig. 13, for instance; cf. claims 24-45].

Choose one of:

- B1. Patterning the retardation film comprises mask rubbing an alignment film [cf. claims 22, 42, 44].
- B2. Patterning the retardation film comprises photoalignment of an alignment film [cf. claims 23, 43, 45].

Choose one of:

- C1. Liquid crystal layer has phase difference of  $\lambda/2$  in the transmissive area [cf. claims 7 and 33].

C2. Liquid crystal layer is in 90° twisted nematic state in the transmissive area  
[cf. claims 8-10 and 34-36].

Choose one of:

D1. Liquid crystal is in a TN state in the reflective area [cf. claims 9 and 35].

D2. Liquid crystal is in an ECB mode in the reflective area [cf. claims 10 and 36].

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, the claims not recited above with respect to each species are believed to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. A telephone call was made to David R. Metzger, Reg. No. 32,919, on 29 March 2005, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
